Antenna area:

Reflector screen: Aluminum. **Radiator:** Tin plated zinc.
Cylindrical fiberglass radome: The max. radome diameter is only 100 mm | 3.9 inches. Fiberglass material guarantees optimum performance with regards to stability, stiffness, UV resistance and painting. The colour of the radome is similar to light grey RAL 7035.
All screws and nuts: Stainless steel.

Environmental conditions:

Kathrein cellular antennas are designed to operate under the environmental conditions as described in ETS 300 019-1-4 class 4.1 E. The antennas exceed this standard with regard to the following items:

- Low temperature: -55 °C
- High temperature (dry): +55 °C

Ice protection: Due to the very sturdy antenna construction and the protection of the radiating system by the radome, the antenna remains operational even under icy conditions.

Environmental tests:

Kathrein antennas have passed environmental tests as recommended in ETS 300 019-2-4. The homogenous design of Kathrein's antenna families use identical modules and materials. Extensive tests have been performed on typical samples and modules.

Order Information

Model	Description
800 20126	Omni antenna, 4.3-10 connectors
800 20126K	Omni antenna, 4.3-10 connectors, includes 840 02000 Universal mount & cable concealment shroud
840 02000	Universal mount & cable concealment shroud Includes all attachment hardware
840 02001	Pole mount adapter sleeve for 2" mast

See supplemental mount information

Please note:

As a result of more stringent legal regulations and judgements regarding product liability, we are obliged to point out certain risks that may arise when products are used under extraordinary operating conditions.

The mechanical design is based on the environmental conditions as stipulated in ETS 300 019-1-4, which includes the static mechanical load imposed on an antenna by wind at maximum velocity. Extraordinary operating conditions, such as heavy icing or exceptional dynamic stress (e.g. strain caused by oscillating support structures) or vortex-induced across-wind vibration may result in the breakage of an antenna or even cause it to fall to the ground. These facts must be considered according DIN 4131 annex A2 or EN 1991-1-4 part 1.4 during the site planning process.

The installation team must be properly qualified and also be familiar with the relevant national safety regulations.

The details given in our data sheets have to be followed carefully when installing the antennas and accessories.

The limits for the coupling torque of RF-connectors, recommended by the connector manufacturers must be obeyed.

Any previous datasheet issues have now become invalid.

Universal Mount Kit for Kathrein Slim Pole Antennas

800 10125 Tri-Sector, 800 10126 Omni

KATHREIN

- Single Ø18mm bolt provides flexible attachment solution
- Designed for use with 1/2" flex coax
- 124 mph / 200 km/h wind survival
- All hardware required for installation is included

The low profile mounting bracket is made of stainless steel which attaches easily to both the antenna and the mounting structure.

The included cable concealment shroud is made of sturdy ABS, and has a protective UV coating. It can also be customized to fit various mast sizes and installations.

Universal Mount installed on Adapter Sleeve, which is designed for 2" masts
